• https://babar-jawad-anjum.github.io/personal-portfolio-website • Lahore

Professional Summary

Experienced **MERN Stack Developer** skilled in building scalable and high-performance full-stack web applications using **React, Next.js, Node.js, and NestJS**. Proficient in **REST & GraphQL API design, AWS deployments, and DevOps automation** with **Docker, Nginx, and GitHub Actions**. Passionate about clean architecture, performance optimization, and delivering reliable, production-ready solutions. Committed to continuous learning and leveraging modern technologies to drive **innovation and business growth**.

Core Competencies

Frontend: React • Next.js • JavaScript • TypeScript • HTML • CSS • Tailwind • MUI • SASS / SCSS • Context API • Redux (Toolkit) • Axios / Fetch

Backend: Node.js • Express.js • NestJS • TypeScript • REST APIs • GraphQL • Socket.io • Prisma • TypeORM • Multer • Nodemailer • JWT • OAuth

Databases: MongoDB • MySQL • PostgreSQL • MSSQL • Redis

DevOps & Tools: Git • Linux • AWS EC2 • S3 • RDS • Lambda • AWS CloudFront • CloudWatch • Nginx • PM2 • Docker • Github Actions • Cloudflare • CI/CD

Testing & Quality: Jest • Postman • TDD • Jira • ESLint • Prettier • Husky • Lint-Staged

Architecture & Patterns: MVC • DDD • Repository Pattern • Dependency Injection • Monolithic • Microservices

Others: Firebase • Google Analytics • Google Maps API • C# (.NET Core)

EMPLOYMENT

CoderzHunt

Lahore, Pakistan

Full Stack Developer (MERN)

08/2025 - Present

As a Full Stack Software Engineer, I handle full-cycle product development – backend-focused – overseeing **architecture design, code reviews**, and automated deployments to ensure reliable and scalable releases.

- **Delivered MVP in 3 Weeks:** Contributed to an MVP with a **3-week** delivery window, focusing on backend development using NestJS, MySQL, TypeORM, and **Domain-Driven Design (DDD)** principles.
- **AI Document Analysis:** Designed and implemented an AI-powered document analysis feature using **AWS Bedrock (Claude LLM)** for automated data extraction and structured insights. Ensured **HIPAA compliance** for secure handling of sensitive healthcare data.
- **DevOps & Deployment:** Deployed a 3-tier application (Next.js, NestJS, FastAPI) with **staging** and **production** environments on AWS **EC2**. Configured RDS, Nginx, SSL (Cloudflare), and PM2 for secure and stable deployments.
- **CI/CD & Automation:** Built GitHub Actions pipelines automating code pulls, builds, migrations, and service restarts – removing manual deployment steps. Integrated AWS CloudWatch for log monitoring and performance tracking.
- **Client Collaboration & Communication:** Actively involved in client communication, participating in stand-ups, requirement discussions, and progress updates to ensure smooth project delivery.

Brackets Pvt Ltd

Gujranwala, Pakistan

MERN Stack Developer

10/2023 - 08/2025

As a MERN stack developer at Brackets, I have successfully contributed to several projects, leveraging my Full Stack skills to develop scalable applications. Responsibilities and achievements:

- **Project Initialization & Codebase Setup:** Set up a scalable Next.js project with structured folders and integrated **ESLint, Prettier, and Husky** for consistency.
- **Performance Optimization:** Improved page load time by moving heavy static assets (images, videos, etc.) to **AWS S3**, which reduced latency to around **600ms**. Further optimized performance to **50-60ms** by integrating **AWS CloudFront** for CDN caching.
- **File Management System:** Built a File Management System supporting file/folder creation, copying, deletion, and navigation across **nested directories**, improving usability and workflow efficiency.
- **Performance Optimization:** Implemented the **Suspense** and **Lazy methods** in React for the Veronica's Insurance web app, boosting the response time, overall application performance and reducing the bundle size from **~610MB to ~200MB**.
- **Real-time Location Tracking:** Successfully achieved real-time location tracking in Tour27 project using Next.js, Google Maps API, and **Firestore real-time database**, significantly enhancing user experience and app performance.
- **Google Analytics Integration:** Integrated Google Analytics into Tour27 project, enabling real-time tracking and detailed analysis of user behavior and engagement.
- **Real-time Chat System:** Designed, implemented and tested a robust **real-time** chat system using **Socket.io** for the Tour27 project, enhancing user interaction with seamless and instantaneous communication capabilities.
- **Advanced Git Proficiency:** Mastered advanced Git concepts such as branch **rebasing, cherry-picking**, and commit **squashing** to optimize version control and streamline codebase management.
- **DermOnDemand Development:** Developed the DermOnDemand platform, enabling users to connect with dermatology specialists for skin-related consultations and receive personalized prescriptions, enhancing access to specialized healthcare through a user-friendly interface.

EMPLOYMENT

HazelSoft

Associate Software Engineer

Lahore, Pakistan

07/2023 - 10/2023

As an Associate Software Engineer at HazelSoft, I underwent comprehensive training in

.NET Core technologies, focusing on C# programming language. Responsibilities and achievements:

- **NET Core Proficiency:** Gained proficiency in various aspects of .NET Core technologies, including .NET Core Web API and MVC
- **Design Patterns Implementations:** Understood and implemented various **design patterns** such as Repository and Singleton patterns
- **Advanced Concepts:** Acquired knowledge and applied concepts such as **generic responses, dependency injection, Entity Framework**, and database migrations

Beyond Technologies

MERN Stack Developer

Lahore, Pakistan

10/2022 - 07/2023

As a MERN Stack Developer at Beyond Technologies, I delivered top-notch web apps, elevating project success. Responsibilities and achievements:

- **BIC Project:** Acted as a key Full stack developer and developed backend using Node.js, Express.js and **MSSQL** as a SQL database. Created several APIs and integrated with React frontend
- **Beyond Tech Website:** Led the development of the company's official website using **Next.js** and Tailwind CSS for responsive design, ensuring optimal performance and user experience
- **Serenity Trading Website:** Managed the backend infrastructure with **Node.js, Express.js** and MongoDB for database management, developing APIs for seamless data integration on frontend built with React
- **AutoConsult Revamp Project:** Led the frontend development for the AutoConsult website revamp, translating Figma design into responsive, **pixel-perfect** interactive React components

Education

COMSATS University - Lahore Campus

Bachelors of Science in Software Engineering

Lahore

09/2019 - 07/2023

KIPS College

FSc Pre-Engineering

Gujranwala

04/2017 - 06/2019

English Proficient ●●●●●

Urdu Native ●●●●●

CERTIFICATIONS

Linux For
Absolute
Beginners

— Issued by **KodeKloud** — August 2025

Gained a solid foundation in Linux, learning essential commands, file system navigation, and user management — building a strong base for development and server administration.

Docker Training
Course

— Issued by **KodeKloud** — August 2025

Developed foundational skills in containerization, learning to build and deploy images and applications using Docker in real-world scenarios.

Docker For
Absolute Beginners

— Issued by **KodeKloud** — July 2025

Gained hands-on experience with Docker commands, container management, and multi-container setups, setting a strong base for DevOps and CI/CD practices.

Key Achievements

🏆 Ranked Among Top 10, Code Wars'22
Coding Competition

Secured **Top 10 position** in **Code Wars'22**
by **GDGoC, COMSATS Lahore**,
demonstrating strong Java and problem-
solving skills.

Projects

CarePulse	12/2024 - 12/2024
https://patient-management-system-aka-carepulse-zuh5.vercel.app/	
- Developed a streamlined Patient Management System enhancing efficiency for patients and healthcare staff. - Implemented patient profile registration, appointment booking, and management features with an intuitive interface. - Built an admin dashboard for appointment scheduling, staff management, and workflow monitoring. - Integrated real-time SMS notifications using Twilio, improving communication and appointment reliability. - Focused on secure, scalable architecture to ensure compliance and smooth handling of sensitive healthcare data.	
B-Log	11/2024 - 11/2024
https://676398c2caee5e00089f71d3--b-blog-app.netlify.app/	
- Developed a full-featured blogging platform using React 19 and Node.js, enabling users to create, manage, and delete blog posts. - Implemented commenting, category-based filtering, and save-for-later functionality to enhance user engagement. - Integrated Clerk for secure authentication and ImageKit for optimized image management. - Used React Query for efficient server state management and real-time content updates.	
Advanced MERN Auth	09/2024 - 09/2024
https://advanced-mern-auth-nurw.onrender.com/	
- Built a secure authentication system with signup/login, email verification, and personalized welcome emails. - Implemented forgot and reset password workflows for an improved and seamless user experience. - Secured application routes and APIs using authentication middleware to protect user data. - Developed a user dashboard for managing profiles and account settings. Deployed the application to production, gaining hands-on experience with hosting and environment configuration.	
Real-Estate Platform	08/2024 - 08/2024
https://e-estate.netlify.app/	
- Developed a full-stack real estate application using the MERN stack for seamless property browsing and management. - Implemented JWT-based authentication and authorization, ensuring secure access control for users and property owners. - Built dynamic property listings with advanced filters and a real-time 1-on-1 chat system using Socket.io. - Integrated Google Maps API for location-based property search and property visualization. - Added features for saving posts, creating, and managing listings, with personalized user profiles and preferences. - Utilized Vite + React for a high-performance frontend, SCSS for responsive styling, and Zustand for efficient state management. - Developed the backend using Node.js, Express.js, MongoDB, and Prisma ORM for structured, scalable, and real-time data handling.	
Trello Clone 2.0	12/2023 - 12/2023
https://trello-clone-2-0-qiaa.vercel.app/	
- Developed a customizable task management system using Next.js, TailwindCSS, and Appwrite CMS. - Designed a user-friendly and responsive interface for seamless task organization and team collaboration. - Implemented features inspired by Trello, enhancing productivity through efficient task tracking and management. - Focused on modular architecture for scalability and easy integration with future workflow features.
